

Come to Charter Day

Music, dancing, exhibits, a drama production, dedication of the new sculpture on the mall, Field House tours and lots of good food are some of the things in store for people who attend this year's Charter Day celebration April 23.

Activities on the mall in the center of campus will get underway this Friday at 3 p.m. The new sculpture outside Ely Center will be dedicated, and artist Lloyd Hamrol will be present. Also a group of original prints by Corita Kent, the artist who designed the graphic for the KDES dedication, will be on display. The Gallaudet Dancers will perform four numbers, and the campus community will have the opportunity to see a preview of "Fiddler on the Roof" presented by the MSSD Drama Department. A home-grown talent show will also be part of the afternoon's events.

A highlight of the celebration will be a picnic of barbecued ribs and chicken for faculty, staff and their families (remember to bring your tickets). The food will be served in the Hall Memorial Building parking lot, and employees who usually park there will be asked to park in the 6th Street lot instead. If it should happen to rain, all activities will be held in the parking lot under the Plaza, and persons who usually park in that area will be asked to park in the 6th Street lot.

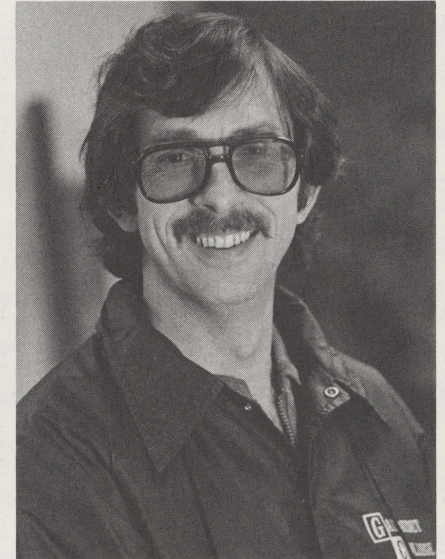

Although activities on the mall will begin at 3 p.m., activities in the newly-opened Field House will start earlier. Here's the schedule:

- 9-10 a.m. Self-guided tours.
- 10:30-11:30 Guided tours (20-30 mins.) Meet in the Field House lobby.
- 11:30-12:30 Sports Medicine Clinic, room B-14, lower level. For the recreation athlete, a discussion of common problems (sore feet, stiff muscles, sprained ankles) conducted by Joseph Fritsch, athletic trainer.
- 12:30-1 p.m. Central activity area demonstration—bleachers, message centers, scoreboard.
- 1-2 Beginning racquetball clinic, at the courts (lower level). Conducted by Robert Jackson, assoc. professor, Physical Education.
- 2-3 Advanced racquetball clinic, at the courts. Conducted by Robert Jackson, assoc. professor, Physical Education.
- 2-4 Guided tours every 30 minutes. Meet in the lobby.
- 2:30-3:30 Demonstration of weight training equipment, weight room (lower level). Conducted by Jay Conley, Gallaudet student/athlete.

For racquetball and handball enthusiasts, hours for use of the five Field House courts are Monday-Friday from 7-8 a.m., 12-1 p.m. and 4-10 p.m.; and Saturdays and Sundays from 4-10 p.m. Hours for using the weight training room are the same. Lockers in the Field House are still available for faculty, staff and students; lockers for summer use will be issued May 30. See Dave Elam in the Field House equipment room if you're interested in a locker. Persons who currently have lockers must empty them before May 21 for cleaning.

Ausma Smits

Mike Kaika

New DRCC members elected

Newly-elected members of the Deafness Related Concerns Council are (clockwise from left) Ausma Smits of the History Department, Mike Kaika of the Alumni and Public Relations Office and Barbara Kannapell, linguistics specialist with IDEC. The three will serve on the DRCC, which represents the concerns of the 267 deaf employees at Gallaudet, for the years 1982-84. They were elected by 183 (69%) of the deaf employees on campus. Other DRCC members, who are serving through 1983, are Harvey Goodstein of the Mathematics Department, Eric Malzkahn of the MSSD Drama Department and Debbie Sonnenstrahl of the Fine Arts Program.

Barbara Kannapell

Computers serve entire campus

by Laura-Jean Gilbert

Whether you are an undergraduate student, a faculty member, a College librarian, a staff member in the Registrar's Office or a campus police officer, you have something in common beside the fact that you spend your days on Kendall Green. That "something" is the use of Gallaudet's computers.

The largest Gallaudet computer—a DECsystem-10 computer manufactured by Digital Equipment Corporation—is currently located in Hall Memorial Building, but members of the campus community have access to its services through a network of on-line terminals and through dial-in service (x5618).

Gallaudet College Computer Services (GCCS) is a part of the Office of College Educational Resources. The name GCCS is effective April 15, 1982 and replaces the designation Gallaudet College Computer Center. The main goal of the Center is to support the educational, research and administrative pro-

cesses of the College. The DEC-10 operates 24 hours a day, seven days a week, except for regularly scheduled maintenance times (Tuesday and Thursday from 4-8 a.m. for hardware maintenance and Monday and Wednesday from 6-8 a.m. for software maintenance). A computer operator is on duty from 8:30 a.m. to 10 p.m. Monday through Friday, and 9 a.m. to 4 p.m. on Saturday.

Two offices making major use of the computer services are Admissions and Records (which includes the Registrar's Office), and the Division of Business Affairs. The Registrar's Office uses the computer not only for registration, but also for maintaining student records and grades. Information on the current status of class enrollment is available to students via the Gallaudet College campus cable TV network and on printouts posted outside the Registrar's Office. The Admissions Office processes applicants' entrance examination and

continued on page 2

Anyone can use the computer terminals in the GCCS user room in Hall Memorial Building.

Gallaudet College Computer Services

continued from page 1

diagnostic tests by means of computer.

The Division of Business Affairs uses the computer for financial accounting and record keeping purposes. The Business Office keeps records of students' accounts, does the record keeping for the College payroll and benefits and maintains records on purchases for the campus. The Department of Safety and Security keeps a record of cars registered on campus as well as tickets issued, paid and still outstanding. The Bookstore, also part of Business Affairs, uses the computer for sales and inventory records. Personnel maintains employment records on the DEC-10.

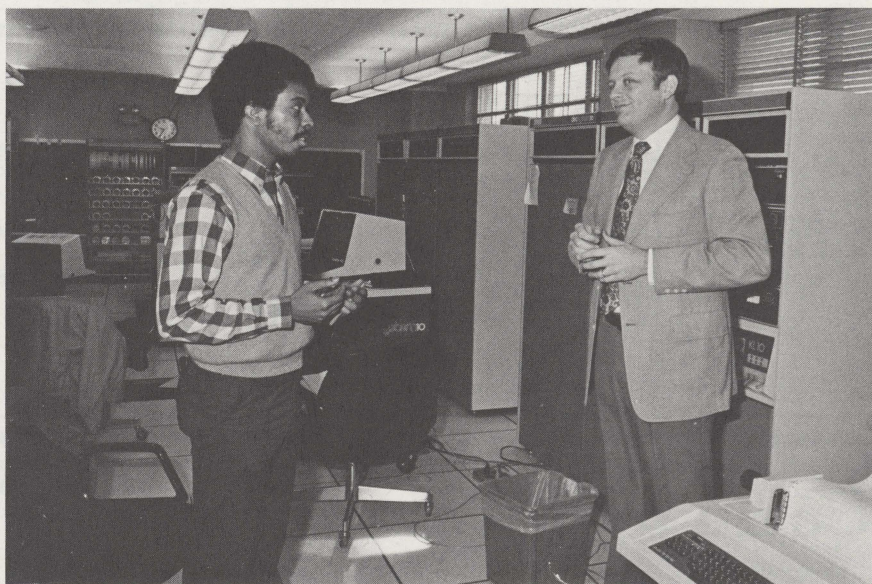

Another major user of the GCCS is the Division of Research. The Center for Assessment and Demographic Studies, for example, compiles much of its research on forms which can be entered directly on the computer through use of optical mark reading (Sentry 7001). Whether researchers are working in the areas of demographics, linguistics, sensory perception or Cued Speech, they are making use of the computer for statistical analysis, record

keeping and research projections.

The Library uses the computer to generate the microfiche catalogue (its famous ComCat). Student Life uses the computer for room reservation purposes.

The Development Office makes use of the Computer Center to record donations to the College as well as to maintain a mailing list of donors. The office of Alumni and Public Relations updates the computerized alumni mailing list directly through a terminal in the A/PR office. They also maintain on the computer the subscription list for the College's magazine, *Gallaudet Today*, and also keep a mailing list for other public relations and mailing purposes that can be broken down by categories. Many other offices also maintain their mailing lists on the computer, and GCCS is working on a system which will eliminate duplication when two lists are put together for a single mailing.

Student Special Services uses GCCS to make braille materials for deaf-blind students. GCCS has a braille embosser that can encode in two different ways: Braille I produces word-for-word transcription; Braille II groups words so

GCCS Director Kevin Casey, right, talks with computer operator Ed Oliver in the central processing area.

that a blind person may read more quickly.

The use of the computer for instructional purposes is growing. For many years, the Russian Department has had language assignments for students studying that language on the computer. Many other departments—Physics, Chemistry, Mathematics, German, Sociology, for example—are also using or have used the computer for instructional purposes. The English Department makes a great deal of use of the computer in its Tutoring Program and has a bank of terminals available in its English classrooms for student use. The English Language Program consists of more than 200 lessons covering many areas.

The new academic major in International Studies has added a course in Computer Literacy for undergraduate students to the curriculum. Also added is a Computer Literacy seminar for faculty members. Both these courses have been developed out of recognition that the ability to understand computer capabilities is becoming increasingly important in today's world.

GCCS offers a variety of courses in computer use to faculty, staff and students. During the past year GCCS offered ten short courses attended by about 230 faculty, staff and students. Course offerings are listed regularly in the GCCS newsletter.

At the Pre-College level, the computer is also used for instructional purposes. A number of Computer Assisted Instruction (CAI) packages are available to both MSSD and KDES students.

The Home Economics Department of the College is planning to add com-

puter courses related to food management. They also want their students to be aware of the potential the computer has for future use in people's homes.

Gallaudet's Printing and Graphic Services which is both an instructional and a service unit on campus, has recently added a new typesetting capability. The technical possibility exists for this new equipment to interface with the computer so that, someday, material stored in the computer or keyboarded to computer storage via a terminal anywhere on campus, could be converted to typeset copy for printing.

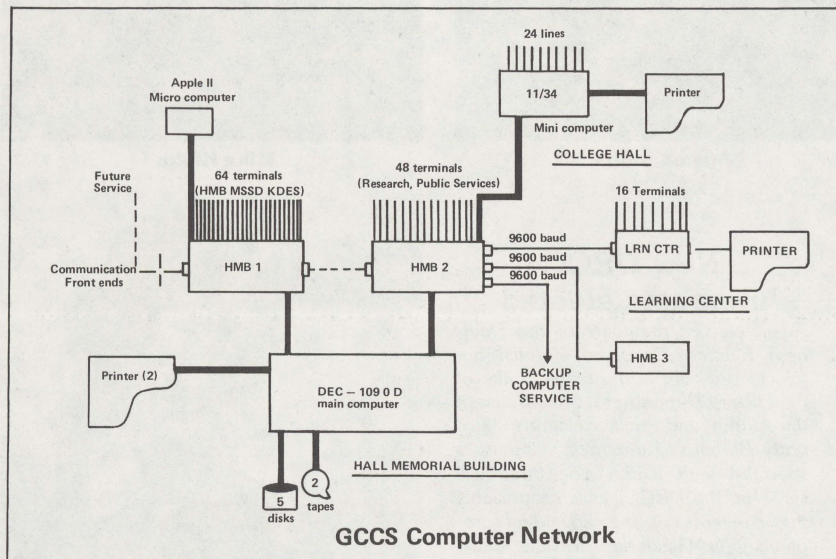

While computer use is growing and more and more offices are adding or wish to add their own terminals, the computer's capabilities are finite. Gallaudet's DEC-10 now has a 512,000-word memory. The computer currently handles 65 timesharing jobs at a time. Addition of terminals by departments must be carefully planned with GCCS. GCCS also is beginning to plan for the computer services that will be needed at Gallaudet's new Northwest Campus.

"We will need to be adding more equipment, more lines, more memory capability," Kit Schreiber, a programmer and one of the Computer Center's 22 staff members, explained, "but at the same time, the whole field of computer technology is changing rapidly and we don't want to add equipment that will quickly become obsolete."

For example, GCCS now has five terminals (soon to be eight) and a printer in the Terminal Area in the Learning Center. (For the technically oriented user, those new terminals are all connected to a new "NODE", a PDP 11/24, called LRNCTR.) There is also a printer with both upper case and lower case capabilities in the same area. It will soon be located in a room near the terminals (the old Learning Center "Mail Room"). Details about access to the Learning Center printer and the HMB printer will appear in a future edition of the GCCS newsletter.

User aides currently work in the Learning Center from 12 noon to 4 p.m. Monday through Friday. Those hours will be expanded soon. Users may use these terminals whenever the Learning Center is open. For a picture of the Learning Center node addition and the rest of the network, see the GCCS Computer Network diagram which accompanies this article.

GCCS staff members are available to consult with campus departments, offices and personnel and to make suggestions for ways in which the GCCS may be of service to them.

Serendipity Library Bits & Pieces

New media

by Regina Koch

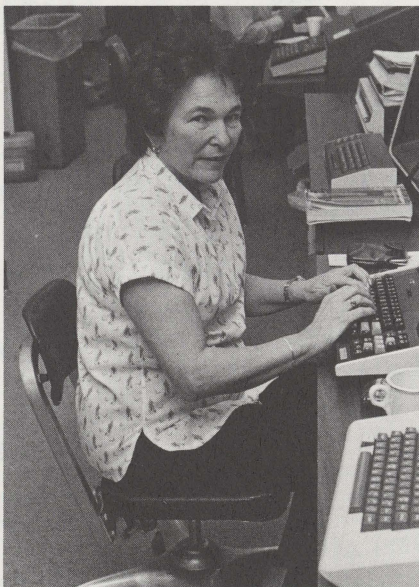

With all the new developments in computer technology these days, it is hard to keep up with all of the changes. It is quickly becoming a necessity for every person to have a general understanding of how computers can help us in our everyday life. A new series of videotapes, "Adventures of the mind," produced by Johns Hopkins University Applied Physics Laboratory, explores the world of computers. "Hardware and software" (#1839) gives a brief explanation of these two components of computer systems. "Speaking the language" (#1840) demonstrates simple computer programming in BASIC. "For better or for worse" (#1842) discussed the social impact of computers on society today. "Extending your reach" (#1843) discusses networking and databases and includes a few examples of the ways computers can aid physically handicapped people. The whole series is

available for viewing on videotapes #1838-#1844.

Two new videotapes dramatize the effects of alcohol on driving. "Happy birthday" (#1828) was produced by Gallaudet College Television and shows what happens to a student who drinks too much at his birthday celebration and the consequences he suffers as a result. "Just one" (#1834) produced by Narcotics Education, Inc. is about a student reporter who investigates the problem of drinking and driving.

Getting a job is never an easy task. A slide and sound cassette series designed for the student called "Job quest series" by the University of Wisconsin-Stout Materials Development Center helps make the search an easier one. Each set is accompanied by a script.

If you are interested in viewing these videotapes or others, call Television Cable Service at x5931 (voice) or x5932 (TDD). The slide sets and other audiovisual materials are located on the lower level of the Learning Center. Stop by Individualized Learning or call x5580 (voice) or x5579 (TDD).

Kit Schreiber is a computer programmer with GCCS.

CER arranges equipment use for deaf lawyer in Supreme Court

You probably saw on television recently that a deaf attorney, Michael Chatoff, had argued the Amy Rowley case before the Supreme Court using a stenotypist and a computer system which permitted him to read what the justices and other persons said in the court. What you may not know is that Gallaudet College was instrumental in helping the attorney with the technology.

The attorney, who is not skilled with sign language, called Bob Davila, a friend, to ask if there were some way he could be helped. Davila contacted Don Torr of College Educational Resources, who said there was an answer at Translation Systems Inc. in Rockville, MD. Torr called the president of the company, Don Nixon, with the suggestion that a very minor modification of their system would make it possible to use their system to help Chatoff. Nixon volunteered support, as did AM Jacquard Systems, the computer manufacturer. Joseph Karlovits of Pittsburgh agreed to do the stenotyping.

The justices granted their permission

to use the equipment, and Gallaudet coordinated arrangements with the marshal of the court and all participants for two test runs and a live run. The system worked well, and Chatoff was able to respond to questions from the justices with delays of only a few seconds.

A television documentary is being prepared by College Educational Resources, and a portion of an exclusive afternoon interview with Amy Rowley on the day of the argument was captioned and rushed by Gallaudet Television to CBS. The network aired the program nationally on the 7 p.m. news with credit to Gallaudet. The national coverage has already shown signs of producing an awareness of how deaf people can be helped in court cases by new technology.

Many CER people contributed to the event and its documentation: Kevin Casey, John Scott, Tom Klagholz, Richard Chiarizia, Priscilla Brown, Larry Ashley, Carol Moy, Herb Pearson, John Novack, Jim Pope and Charlie Shoup.

Update on congressional action

by Charlotte Hawkins-Shepard

H.J. Resolution 409, passed by the House March 24 and by the Senate March 31, is now Public Law 97-161. This legislation is another continuing appropriations law that will be in effect until the end of fiscal year 1982. Passage of P.L. 97-161 supercedes the regular appropriation bill HR 4560, so no action will be taken on that bill.

A number of other bills are still pending in Congress:

- H.R. 1779 ("To terminate the Department of Education.") This bill has had no action. It was referred jointly to two committees—Government Operations and Rules.

- H.R. 2289 ("To terminate the Department of Education.") This bill has had no action and was referred jointly to two committees—Government Operations and Rules.

- H.R. 985 ("To terminate Federal involvement in education.") This bill is in the Government Operations Committee and has had no action.

- S. 1821 ("A bill to terminate the Department of Education, to define the

responsibility for Federal educational assistance, and for other purposes.") This bill is in the Committee on Governmental Affairs. No action has been taken on it.

A little known but excellent resource for information on the status of federal legislation is the Office of LEGIS Information, known as the LEGIS Office (phone 225-1772). This office has 12 professional staffers employed under the direction of the Clerk of the House of Representatives. Most calls they receive come from congressional offices, but this is probably because the office is not too widely known.

Using computers, the office instantly accesses committee reports, public law information, some topical content and other related areas. They can easily access bills by number, with some bills the office will not need the number—just a brief description. This office is completely separate from the Congressional Information Service (CIS), a private concern.

Children's summer rec program expands

This summer's Children's Summer Instructional and Recreation Program will be held on campus for six weeks, from June 21-July 30, in the Hughes Gym.

This year, the Physical Education Department has announced that an afternoon recreation program will be held to supplement its existing morning instructional program.

Children from ages 4-10 can participate in either the morning program, which will be held from 8:30 a.m.-noon, or in the afternoon program as well, which runs from 1-4:30 p.m. Cost of the morning program is \$50 per child for each session, and \$35 for each additional child. Cost of the afternoon recreation program is \$30 a week for each child, and \$20 per week for each additional child.

Because of space limitations, persons interested in the program are encouraged to return their applications to the Physical Education Department as soon as possible. May 1 is the deadline for returning applications.

Yvonne Green is the administrative secretary with Gallaudet College Computer Services.

Audiology holds free screenings

From May 3-6, the Department of Audiology will offer free hearing screenings and electro-acoustic hearing aid checks for all Gallaudet faculty, staff, students and their families.

Hearing screenings will be held from 8:30 a.m.-3:30 p.m. in room 121 of Mary Thornberry Building, and hearing aid checks will be held at the same location from 12:30-3:30 p.m. Both services will be on a walk-in, first come-first served basis.

Children's theatre production begins

THE GREAT CROSS COUNTRY RACE or "The Hare and the Tortoise," this year's children's production of the Theatre Arts Department, will be performed April 22-24 at 7:30 p.m. and also on April 24 at 2 p.m. in Elstad Auditorium.

The play is written by Alan Broadhurst and directed by Victoria Brown.

Tickets are \$2 for students and children (including sign language students) and \$3 for all others. Reservations can be made by calling x5605 voice or x5608 TDD. Box Office hours are April 19-23 from 2-7:30 p.m. and April 24 from noon-7:30 p.m.

Among Ourselves

Dr. Lottie Riekehof of the Department of Sign Communication was the keynote speaker at the annual conference of the Illinois Teachers of the Hearing Impaired held in Peoria March 5 and 6. She also conducted workshops on total communication in the classroom as well as on the use of interpreters.

Dr. Barbara Bodner-Johnson and Dr. Carol LaSasso, both of the Department of Education, presented papers at the recent conference of the American Educational Research Association held in New York City. Their papers were entitled "Family Environment and Academic Achievement of Hearing Impaired Children" and "Comparability of Deaf and Hearing Students' Performance on Selected Reading Comprehension Tasks" respectively.

Joe Fritsch, a member of the Physical Education Department, recently traveled to Milan, Italy as a trainer for the United States Indoor Track Team. While in Milan, he visited with Irene Menegoi Buzzi-Donato, principal of the G. Tarra School for the Deaf, where he observed physical education classes and talked with students. On March 10 he traveled with the U.S. team to Birmingham,

England and while there, made contact with the headmaster of the Royal School for the Deaf.

Boriz Bogatz, assistant dean of the School of Education and Human Services, recently participated in the 2nd Annual Conference of the International Association of Conference and Events Directors in Kansas City. Dr. Bogatz was elected to the Board of Directors of this organization.

Deborah Sonnenstrahl made a first-time effort at giving a presentation on museum accessibility to a deaf audience, the Connecticut Chapter of the GCAA in Hartford, March 28. More than 50 people attended, including several local museum professionals. Art works in three local museums were discussed.

Max Fitz-Gerald, human sexuality specialist at MSSD, and his wife, Della, are presenting a series of four workshops at the Family Life Center in Columbia, MD. Two workshops, "Issues in a Clinical Setting" and "The Classroom Teacher" were presented in March. Upcoming workshops will be "The Fall of Superman" on April 21 and "Sex and the Challenging Teenager" on April 28.

Gallaudet College is an equal opportunity employer-education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

Calendar of Extension Events

In the last few years, Gallaudet has been making a concerted effort to bring our educational resources to deaf adults, parents of deaf children and the professionals who serve them. Many units and departments within every division have participated in the planning and implementation of presentations, workshops and courses held throughout the United States and internationally.

In the U.S. and Canada, many of these efforts are coordinated regionally through the Gallaudet College Extension Centers (GCEC) and the Special Schools of the Future (SSOF). While the primary focus of the entire Division of Public Services, the International Center on Deafness (ICD) and the Outreach Unit Affiliated Schools Program (ASP) of the Pre-College Division is to provide extension educational activities, other campus units also sponsor activities. The professional expertise needed to respond to all of these requests for services is drawn from throughout Kendall Green and reported through the Office of Extension Programs, College for Continuing Education.

The office plans to keep the campus better informed about the programs provided elsewhere. Each month a Calendar of Extension Events will be provided. For more information regarding the completed or upcoming events, please contact the campus sponsor, the Office of Extension Programs or the ICD. If you would like to have any of your activities added to the Extension Calendar of Events, please contact Regan Quinn (x5599) before the 8th of each month.

Educational Foundation plan foundering

President Reagan's plan to turn the present Department of Education into an Educational Foundation has received heavy criticism from Congress. However, according to several administration officials, the idea has not been scrapped. The administration has not yet sent to Congress legislation relating to this action, wanting to spend more preparation time before doing so.

Members of Congress, including lawmakers who would be directly responsible for handling such legislation, have shunned the foundation concept. There have even been recent rumors that the unpopular plan has been wiped from the administration's legislative agenda for this year. Some sources have said

that the White House does have a draft bill. Others have indicated that such a bill, not even introduced yet, is unlikely to receive congressional action this year.

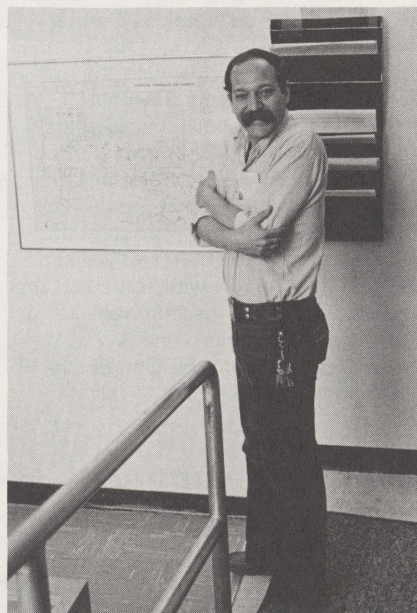

Faculty Research

Described in this column are research projects that received assistance from the Office of Faculty and Graduate Student Research. For more details on projects discussed, contact Clarence Williams, Division of Research, x5030.

Basketball research

Kathryn Baldridge of the Physical Education Department and Francine White of the Department of Counseling are planning a research project related to the performance of the women's basketball team. The study will measure the performance of the team before and after training in muscle relaxation and visual imagery. In addition, differences in person adjustment will be measured.

In an attempt to determine whether the training makes a significant difference in performance, they will be looking at differences in the percentage of field goals, percentage of foul shots, number of personal fouls and turnovers, and the personal adjustment of each player as measured by the Personal Skills Map developed by Nelson and Low. The goal of the study is improved performance skills during stressful situations for the students involved, both on and off the basketball court.

Jim Pope is chief of operations with GCCS.

NC team wins

The North Carolina Club for the Deaf basketball team, coached by Hubert Anderson, a full-time student at Gallaudet, won the 38th Annual American Athletic Association of the Deaf Basketball Championship held in Miami Beach, March 29—April 3. North Carolina defeated last year's champs, Hollywood, CA, 60-58 in double overtime.

Anderson, who was head basketball coach at Gallaudet a few years ago, has been driving down to Charlotte every weekend since November to coach the club. NCCD won the SEAAD tourney earlier in March held in Spartanburg, S.C. Two Gallaudetians played for the NC team—William Ward, currently a senior and Mike Stewart, a 1979 graduate.

An Invitation

All persons on Kendall Green are invited to meet and talk with a panel of Consortium professors and administrators this Wednesday, April 21 from 3-6 p.m. in Ely Center. A reception will follow the panel discussion.

Members include Dr. Barbara Brauer, clinical psychologist at Gallaudet; Lori Shpunt, poet and English professor, Trinity College; Dr. Myra Sadker, dean of Education, American University; Dr. Marjay Anderson, chairperson, Comprehensive Sciences, Howard University; Dr. Phyllis Chock, anthropologist, Catholic University; and Dr. Annette Shelby, professor of business administration, Georgetown University.

The program is sponsored by the Women's Program Committee, Consortium of Universities of the Washington Metropolitan Area.

Phone no. changes

Three persons in the Physical Plant now have new telephone numbers: Marty Willigan, x5231 (formerly 5230) Edward Adegbite, x5226 (from 5205) George DeBrah, x5226 (from 5205)
